Retail Execution System

BPWise

CPM (Corporate Performance Management) system used by finance departments in month-end closing and financial reporting processes, with generation of detailed P&L reports down to product and customer level.

PromoApp

Web application for planning and managing trade promotions the FMCG industry.

DSR/D4SA

WebMobile application for monitoring performance indicators and sales activities, with automatic national-regional-global consolidation, used by FMCG corporations.

Supplier's Reporting & Packaging

Web application used by retailers in working with their suppliers. It contains two modules:

Reports for suppliers

For suppliers to access, generate, view, download various reports (financial, orders, sales) + Fill-Rate (reasons for partial deliveries).

Packaging - CSR

For suppliers to add packaging information, based on which the retailer reports to local environmental authorities or other local or international entities, to comply with environmental laws.
