Pioneers & Innovators

We started in 1994 developing one of the first integrated management software systems in Romania (SocrateERP) and grew up with the first customers who believed in us. We implemented the Socrate solution in the years that followed in dozens of retail, distribution and production companies. Passionate about technology, software and economics, we have always sought to improve, and we have continually developed and grown people, products, and services.

Today, BITSoftware is a company with innovative business solutions portfolio, over 300 customers, medium and large companies, Romanian and international, and is present in more than 70 countries.

SocrateERP

SaaS. Native in Cloud.
Modern, flexible solution
Automation of business processes.

FluxVision WMS

Automation of logistics processes.
Full traceability in the warehouse.
Innovative cloud solution.

FBAA

Agricultural farm management.
GIS. Agricultural works, treatments.
Alerts. Inspections. Costs.

SocrateBI

Latest generation platform.
Web and mobile reports.
Better decisions in real time.

BPWise

Planning, consolidation and reporting.
Closing of the month, P & L.
Multiple scenarios such as What-if.

D4SA

Dashboards for Sales Analytics.
Track sales. KPIs Tree.
Webmobile. Smartphone & Tablet.

BITSoftware's complete solutions address companies that want to better manage their resources and activities, in all departments, in order to be more efficient and improve productivity for sustained growth in the long run.

Successful partnerships

BITSoftware maintains close partnerships with technology companies, having international partners such as Amazon, Oracle, Microsoft, MicroStrategy, Google and TeamSystem, but also with implementation and development partners for its solutions. These partnerships have enabled BITSoftware to draw on the resources and expertise of key market players to help develop state of the art software solutions.

Excellence in services

Due to the complexity of company's activity, business solutions have also become complex, important for the success of an organization using such systems is not only the quality and functionality, but also the way they are implemented. BITSoftware offers the best services and methodologies that ensure a lean implementation, in order to meet its clients' business objectives.

Young, dynamic team

At BITSoftware we enjoy working together and the results show it. BITSoftware promotes ongoing training and development and encourages its employees to aim high for themselves and for the company. BITSoftware's work environment fosters professional growth, collaboration and a dedication to client.
