

# Crama OnLine

Winemaking: an ancient art,  
a modern industry,  
a global market.

The software solution that allows you to control  
winemaking in all its stages with total traceability,  
from grape harvesting to wine bottling.

# Software solution for Winery

**Crama OnLine** is specially designed to control winemaking, to help make the best decisions, to increase wine quality and wine cellar profit.

**Interactive map** of the wine cellar

**Tracking** of winemaking processes

Laboratory analyzes  
**Management**

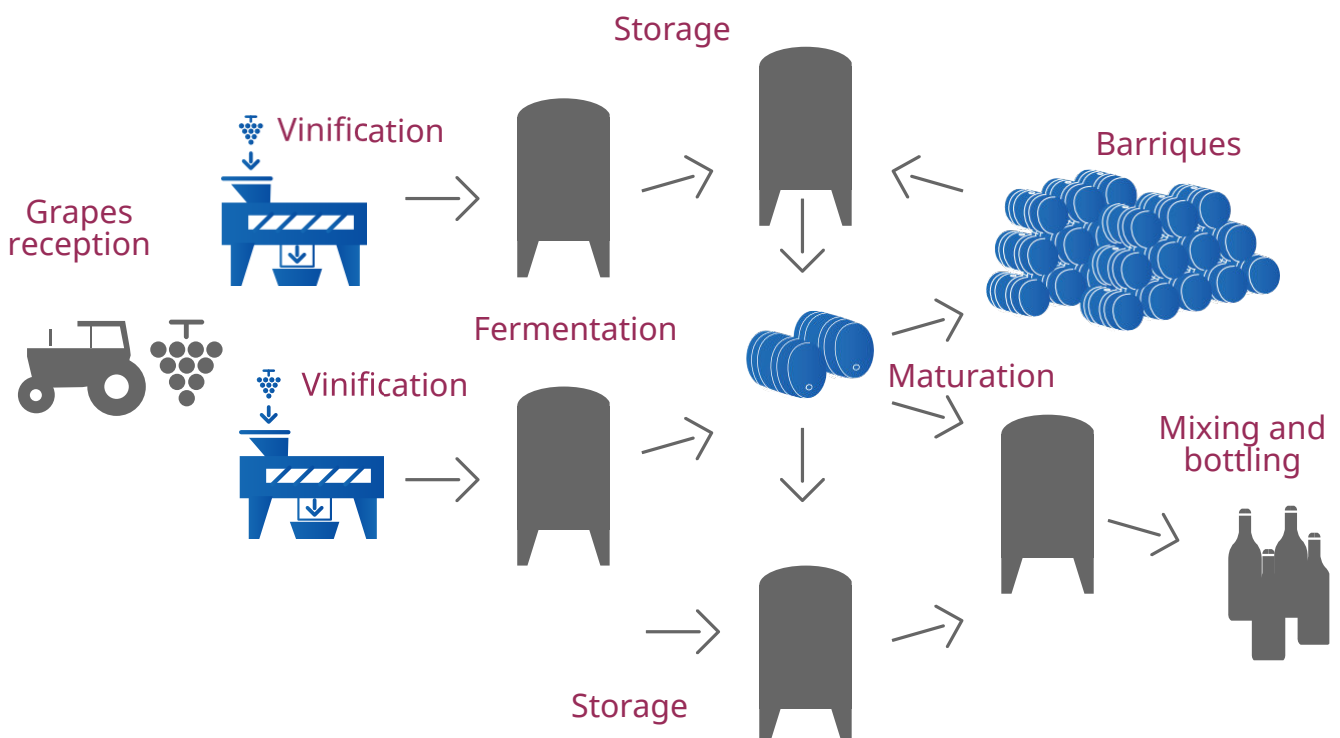

**Traceability** from grape to wine

All the **data and information** is available to the user with one click, without having to search through folders and registers.

The wine has a precise traceability: all the **vinification details are registered and traced**, from grape reception to wine bottling.

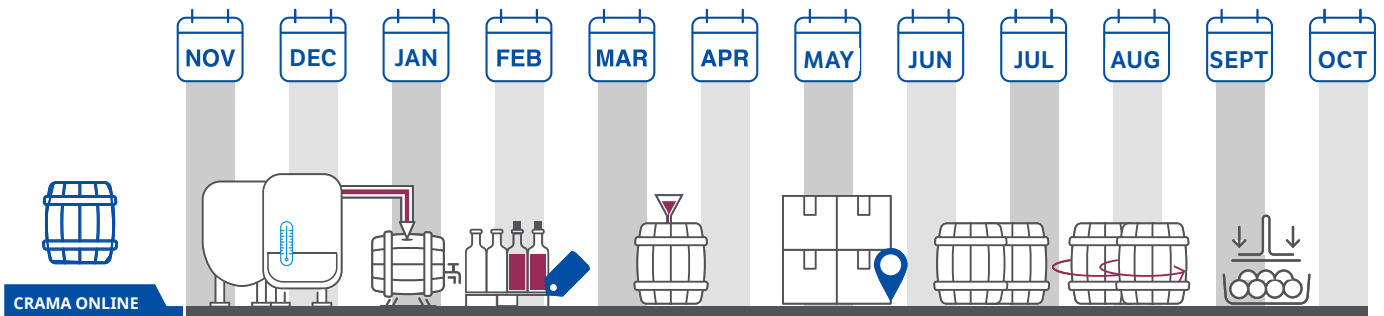

**The traceability of wine and the history** of each tank or baric can be achieved by making a minimum number of actions / steps.

**Trasabilitatea vinului și istoricul** fiecarui tanc sau baric poate fi obținută făcând un număr minim number of actions / steps.

# Functionalities

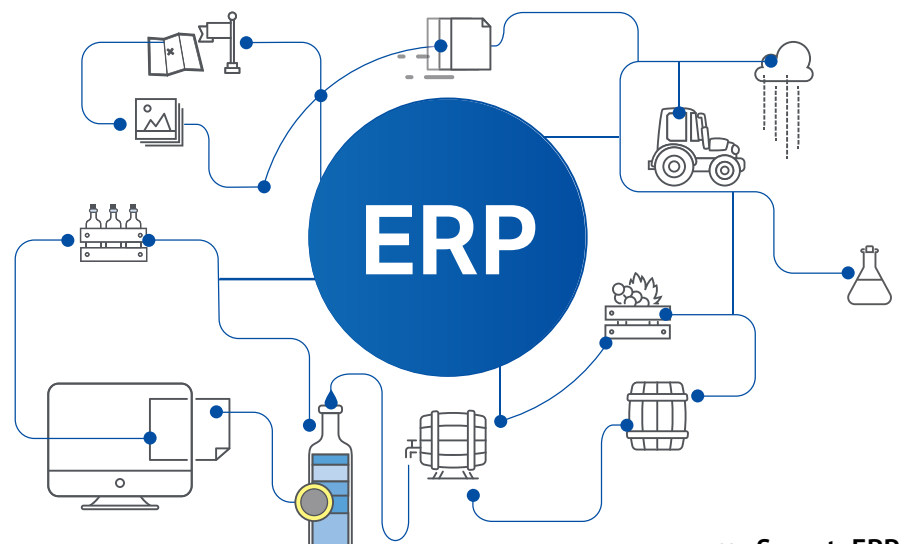

- Navigate to the **interactive map of the wine cellar**.
- Manage and query the **vinification process in real time**.
- Track in real time the evolution of wine in cuve, tanks and barrels, as well as their stock.
- View the detailed **datasheet of each cuvette** with specific dates for each activity you perform (additions, analyzes, fermentation charts, pumping, tasting sheet).
- Control the storage areas and have the security of **wine tracking**.
- Manage work orders and hours consumed to calculate the **cost of production**.
- Integrate with **weighing systems** and other automated winemaking systems and tanks parameter measurement.
- Integrate with the most used **laboratory instruments**.
- Schedule work and work orders in the wine cellar.

## Key aspects

- Tracking
- Production costs
- Lab analysis
- Traceability
- Work orders
- Wine cellar reports
- Storage and maturation

## Processes
